**ULTRA
BRIGHT™**

SLI64

SLI62 - Ultra Bright™ Coaxial Spot Light - **2x** brighter than the SLI12 in constant mode; **5x** when overdriven using the Pulsar 320 Strobe Controller.

1,030,000 Lux (at 700mA) for use with microscopes, small area illumination, or with fiber optic bundles. The light works with our fiber couplers (P/N CPI12), which are designed for use with the Moritex, Schott-Fostec, and Dolan-Jenner fiber bundles. The 24v version of the light is built with a driver that features:

- 0 - 10v remote control
- PWM compatible

Currently available only in white.

Stock item: SLI62-WHI24

SLI64 - Ultra Bright™ Compact Spot Light provides 12,000 Lux at 12" (at 700mA). This light is designed to provide intense illumination for non-specular items while taking up a minimum of space. The 24v version of the light is built with a driver that features:

- 0 - 10v remote control
- PWM compatible

Currently available only in white.

Stock item: SLI64-WHI24
